

ADK Group: Web Platform Guide

MARKETING / LEAD CREATION EDITION

When marketing your brand or creating marketing leads from your brand is the primary purpose for your website, there are many platform types to choose from including: a Content Management System (CMS), a Static Web Builder, a Drag-&-Drop/Templated Web Builder or a Hybrid CMS/Drag-&-Drop solution. As you look at the qualities below, there is no formula or decision tree that will help you determine the right answer. Its different for every website and organization. Use the guide to get a better understanding of the capabilities of each platform type and contact us for a more in-depth conversation to help you get to the right decision for you.

Platform Type Notes

SEO FRIENDLY: How critical is SEO?	
CMS	<ul style="list-style-type: none">• basic SEO practices easy to implement
Static Website Builders	<ul style="list-style-type: none">• basic SEO practices easy to implement
Hybrid CMS/Drag-&-Drop	<ul style="list-style-type: none">• designed for SEO
Drag-&-Drop Web Builders	<ul style="list-style-type: none">• takes a fair amount of custom work to make SEO friendly
CONTENT FREQUENCY: How often do you plan to publish new content?	
CMS	<ul style="list-style-type: none">• most have robust content publishing systems
Static Website Builders	<ul style="list-style-type: none">• adding blog content requires some knowledge of code• CMS plug-in can be added for easier publishing
Hybrid CMS/Drag-&-Drop	<ul style="list-style-type: none">• designed for frequent content changes
Drag-&-Drop Web Builders	<ul style="list-style-type: none">• easy to add new content• has templates for blogging
UPDATE FREQUENCY: How often do you plan to make changes to the existing content?	
CMS	<ul style="list-style-type: none">• modular template makes it easy to edit existing or create new pages
Static Website Builders	<ul style="list-style-type: none">• not designed for frequent changes• requires some knowledge of code to add new pages
Hybrid CMS/Drag-&-Drop	<ul style="list-style-type: none">• easy to edit existing or create new pages• limited to out-of-the-box template
Drag-&-Drop Web Builders	<ul style="list-style-type: none">• easy to edit existing or create new pages• limited to out-of-the-box template

PUBLISHING FRIENDLY: Who publishes new content or creates new pages?	
CMS	<ul style="list-style-type: none"> • easy for anyone to create new content or pages • includes roles with limited access for greater control over access to publishing
Static Website Builders	<ul style="list-style-type: none"> • adding blog content requires some knowledge of code • CMS plug-in can be added for easier publishing
Hybrid CMS/Drag-&-Drop	<ul style="list-style-type: none"> • designed for marketers to publish content
Drag-&-Drop Web Builders	<ul style="list-style-type: none"> • designed for marketers to publish content
CUSTOMIZABILITY: How often do you plan to make changes to the existing content?	
CMS	<ul style="list-style-type: none"> • has the most plugins for customizations • can change to source code to create unique customizations
Static Website Builders	<ul style="list-style-type: none"> • has many popular plugins for customizations • can change to source code to create unique customizations
Hybrid CMS/Drag-&-Drop	<ul style="list-style-type: none"> • helps to have knowledge of coding for extended customizations
Drag-&-Drop Web Builders	<ul style="list-style-type: none"> • has many plugins for popular customizations • cannot change source code for unique customizations • requires knowledge of unique templating language for customizations
SCALABILITY: How will the functionality of your website need to scale over time?	
CMS	<ul style="list-style-type: none"> • has the most plugins for added functionality • are the most widely know so (almost) any developer can implement customizations down the road
Static Website Builders	<ul style="list-style-type: none"> • fairly customizable but not as many plugins as a true CMS
Hybrid CMS/Drag-&-Drop	<ul style="list-style-type: none"> • not meant to be scaled beyond the purpose of converting leads
Drag-&-Drop Web Builders	<ul style="list-style-type: none"> • many popular customizations available via plugins • requires knowledge of provider's templating language in order to customize beyond the out-of-the-box template
DEVELOPER FRIENDLY: Who will be building the website?	
CMS	<ul style="list-style-type: none"> • best for developers with experience in PHP • can edit source code • most have large communities for support which make it easy for developers to get answers quickly
Static Website Builders	<ul style="list-style-type: none"> • best for developers with experience in HTML and Javascript • can edit source code • no need to learn another syntax (aside from some basic hooks)
Hybrid CMS/Drag-&-Drop	<ul style="list-style-type: none"> • non-developer friendly • cannot edit source code for unique customizations
Drag-&-Drop Web Builders	<ul style="list-style-type: none"> • best option for non-developers • customizations can be made in HTML, CSS, and Liquid Templating • cannot edit source code • may need to consider outsourcing development to someone with specific platform experience if there are scaling needs

SPEED: How important is performance speed?	
CMS	<ul style="list-style-type: none"> • fast if using an out-of-the-box template but customizations can add time • most have large communities for support which make it easy for developers to get answers quickly
Static Website Builders	<ul style="list-style-type: none"> • faster to develop than CMS because there are no database connections that need to be set up
Hybrid CMS/Drag-&-Drop	<ul style="list-style-type: none"> • fast if using an out-of-the-box template but customizations can add time
Drag-&-Drop Web Builders	<ul style="list-style-type: none"> • fast if using an out-of-the-box template but customizations can add time
OWNERSHIP: Who possesses the master copy of your website?	
CMS	<ul style="list-style-type: none"> • like owning • changes from platform providers cannot effect your website because your instance is downloaded to a machine you own (rather than cloud based)
Static Website Builders	<ul style="list-style-type: none"> • like owning • changes from platform providers cannot effect your website because your instance is downloaded to a machine you own (rather than cloud based)
Hybrid CMS/Drag-&-Drop	<ul style="list-style-type: none"> • like leasing • you do not download your own instance so if your platform provider implements a major change to their service, you have no control over how that effects your website
Drag-&-Drop Web Builders	<ul style="list-style-type: none"> • like leasing • you do not download your own instance so if your platform provider implements a major change to their service, you have no control over how that effects your website
MAINTAINABILITY: Who will be maintaining your website?	
CMS	<ul style="list-style-type: none"> • requires manual updates every every 30-60 days but you can employ a third party service to automate this
Static Website Builders	<ul style="list-style-type: none"> • little maintenance necessary
Hybrid CMS/Drag-&-Drop	<ul style="list-style-type: none"> • little maintenance necessary
Drag-&-Drop Web Builders	<ul style="list-style-type: none"> • little maintenance necessary

Confused what we mean by platform type (CMS, Drag & Drop, etc.)? [Read more here](#). Check out [similar guides](#) for websites that have different purposes.
